

BONGANI NYONI

Unit 46A Le Vivier Villas, Wood Drive, Parklands, Cape Town · +27672588222

b.nyoni1101@gmail.com · www.linkedin.com/in/bonganinyoni · [@Falenyoni](https://twitter.com/Falenyoni)

Experienced full stack software developer with experience spanning more than 8 years. I have a passion for developing innovative programs that advance productivity and effectiveness of organizational success. Well-versed in writing code and creating systems that are dependable and user-friendly. Over the last 4 years I have specialized in building secure, compliance-driven systems that handle sensitive, regulated data, working in the Financial Domain on Transfer Agency, KYC, CLM, Credit Enablement and Loan Origination. Confident communicator, analytical thinker, and innovative creator of software systems.

TECH STACK

Languages: C#, JavaScript, TypeScript, Python, SQL
Backend & Frameworks: .NET / .NET Core, ASP.NET Core, EF Core, Node.js / Express, Apache Camel
Architecture & Patterns: DDD, Clean Architecture, CQRS, MediatR, Microservices, Event-Driven, Drools
Testing: TDD, xUnit, Unit & Integration Testing, Robot Framework

Data & Messaging: SQL Server, PostgreSQL, MySQL, Oracle, Kafka, ActiveMQ, GraphQL, Elasticsearch

Cloud & DevOps: AWS (Lambda, S3, SQS, VPC), Azure (Blob, Service Bus, Data Factory), Docker, Kubernetes, GitLab CI/CD, Jenkins

Frontend: React, Redux, Angular, HTML, CSS
Tools: Git, GitHub, GitLab, Jira

EXPERIENCE

11/2024 – DATE

SENIOR SOFTWARE DEVELOPER .NET, SONATA ONE

- **Stakeholder Collaboration** - Collaborating with Tech Leads, product owners, and stakeholders to align the technical roadmap with business objectives and product strategy
- **Backend Architecture & Design** - Lead the design and architecture of backend systems, ensuring scalability, reliability, and optimal performance.
- **CQRS & Read Models** - Applied CQRS with MediatR and dedicated read models to separate command and query responsibilities, improving maintainability and read performance across core modules.
- **Test-Driven Development (TDD)** - Applying unit and integration tests to safeguard complex, regulated business logic.
- **Technical Debt & Maintainability** - Addressing technical debt proactively, optimizing existing systems and prioritize maintainability
- **Cross-functional Delivery** - Working closely with frontend developers, product owners, and stakeholders to ensure seamless integration and alignment of objectives
- **Agile Development** - Engage in agile development processes, contributing to sprint planning, stand-ups, and retrospectives
- **Technical Standards & Best Practices** - Driving technical standards and championing best practices within the backend team.
- **End-to-End System Ownership** - Taking ownership of designing and constructing systems from the ground up.

08/2021 – 11/2024

SOFTWARE DEVELOPER .NET, FENERGO/KAHA

- **Requirements Engineering** - Compilation of high-quality System Requirements
- **Research & Prototyping** - Research and Prototyping of new Technologies.
- **Solution Design** - Decomposition of solution Designs into incrementally deliverable work items
- **Feature Development & Team Coordination** - Feature Development and co-ordination of efforts between team members
- **Testing & Behavioural Analysis** - Performing detailed configuration and behavioural analysis through testing, research, and collaboration with software developers
- **Solution Architecture** - Assisting in the Design and Architecture of Solutions
- **Cloud SaaS (Fen-X) & AWS** - Contributed to Fenargo's cloud, multi-tenant SaaS platform (Fen-X) alongside the on-premise product (Fen-E), building integrations using AWS services including Lambda Functions.
- **AWS Networking (IPv6)** - Architected VPC subnet networking using IPv6 to reduce public IPv4 addressing costs, and authored an internal guide on the approach.
- **ETL & Data Pipelines (Azure)** - Built ETL pipelines to move data into Fen-X using Azure Blob Storage and Azure Service Bus.

CLIENTS

- BMO (Bank of Montreal), ANZ (AUSTRALIA NEWZEALAND BANK), SCB (STANDARD CHARTERED BANK SINGAPORE).
- **CI/CD & Deployments** - Prepare production deployment packages and/or conducting deployments of software applications and tools (CI -CD).
- **Client Lifecycle Management (CLM)** - Develop and Configure Client Lifecycle management feature from technical specifications as provided by Architects.
- **Mentoring** - Provide coaching and mentoring to Junior developers.
- **Bug Fixing & Investigations** - Conduct investigations and solve system Issues (Bug fixing).

03/2020 – JULY 2021

DEVELOPER .NET, CAPITEC BANK LTD

- **Feature Development** - Develop systems from technical specifications as provided by Senior Developers and/or Architects.
- **Production Support (Standby)** - Provide production support to systems and/or products (stand-by support)
- **CI/CD & Deployments** - Prepare production deployment packages and/or conducting deployments of software applications and tools (CI -CD)
- **Mentoring** - Provide coaching and mentoring to Junior developers.
- **Bug Fixing & Investigations** - Conduct investigations and solve system Issues (Bug fixing).

09/2018 – 03/2020

SOFTWARE DEVELOPER, HAEFELE SOFTWARE

- **Software Development** - Development of software applications, database components and related tools
- **Code Reviews** - Participating in code quality reviews
- **Mentoring** - Training interns and junior developers
- **Bug Fixing** - Fixing of application, database issues
- **Deployments** - Conducting deployments of software applications and tools
- **QA & UAT** - Liaising with Quality Assurance for testing and UAT efforts
- **Research & Prototyping** - Research and prototyping of modern technologies.
- **Production Support** - Supporting Client Production Systems

11/2013 – 08/2018

SYSTEM ANALYST/DEVELOPER, SHEARWATER ADVENTURES

- **Full-Stack Development** - Designed and developed WinForms, WPF and ASP.net Applications for reservation, Point of Sale, Vehicle Management and Scheduling, Activity and Platform Management systems.
- **REST API Development** - Creating REST APIs for backend services
- **Documentation & Code Reviews** - Documenting software and participating in code quality reviews
- **Agile Leadership** - Led sprint planning meetings, planned tasks, and reviewed code.
- **Bug Fixing** - Fixing application, database issues.
- **Infrastructure Troubleshooting** - Troubleshooting hardware or hosting environment issues.
- **Deployments** - Conducting deployments of software applications and tools
- **Research & Prototyping** - Research and prototyping of modern technologies.
- **Business Analysis & Project Management** - Business Analysis and Project Management on most projects in the company
- **Third-party Integrations** - Integrating in-house software with third party API's and systems.

EDUCATION

2026 – DATE

HONOURS IN COMPUTER ENGINEERING (PART-TIME, IN PROGRESS), CAPE
PENINSULA UNIVERSITY OF TECHNOLOGY

NOVEMBER 2013

BSC HONORS COMPUTER SCIENCE, NATIONAL UNIVERSITY OF SCIENCE AND
TECHNOLOGY.
